

Matthew Rollo

Carrickfergus | mrollo01@qub.ac.uk | +07592 875976

Hardworking outgoing individual with strong verbal communication skills. Second year in Computer Science at queen's university Belfast. Demonstrates high personal discipline, consistency and goal-oriented focus through regular weight training and competitive badminton. Demonstrates strong teamwork, adaptability, and professional relationship-building through participation in multiple Kainos programs. Organised a local community run, raising over £2000 for Pancreatic Cancer NI. Driven to pursue a technical placement role with a strong foundation in computer systems, software development, and IT problem-solving. Balances part-time retail employment alongside full-time computer science studies which demonstrates strong time management, commitment, and workplace reliability.

Work Experience

Sales Assistant

Eurospar, Carrickfergus

November 2025 to Present

- Maintain strict compliance with age-restricted sales policies.
- Assist with stock replenishment, and deliveries to ensure high product availability.
- Maintain efficient till and counter operations in a fast-paced environment while still ensuring high-quality customer service.
- Demonstrate strong time management by consistently balancing regular shifts alongside full-time degree studies.

Sales Assistant

Card Factory, Newtownabbey

February 2025 to November 2025

- Processed over 300+ high-volume customer transactions daily while upselling, stocking up cards, and tidying cards to a high standard.
- Provided quality customer service to customers by helping them find what they need, going the extra mile to assist a customer or just being kind and polite.

Voluntary Experience

Kainos Code Camps

Kainos-Belfast

June 2021 to August 2024

- Participated in multiple in person/online code camps which provided training in the fundamentals of HTML, CSS, and JavaScript.
- Independently developed web applications such as a Random quote generator and worked in teams of four to develop unique eco-friendly device concepts.

Catalyst Work Experience

Catalyst-Belfast

June 2024 to July 2024

- Collaborated in a cross-functional 5-person team to analyse and solve an IT business challenge for the IT company Instill.
- Developed a strategic presentation which directly addressed client requirements and pitched to senior industry leadership.
